

The murderer has been caught!

Here's where every
everyone was.

- E cannot be in C5 (G is the only person in C5), this isolates E in the last square beside the boar.
- The only island that could possibly have four people on it (per H's clue), is Boar Island, with G, E, F/D, and H. (V cannot be on the island, he needs to be alone with someone.) They all must be between C5 and C8, block the rest of these four columns.
- This isolates B on the last boat, then A.

5. H is on Boar Island, and D is beside the same object type as H.

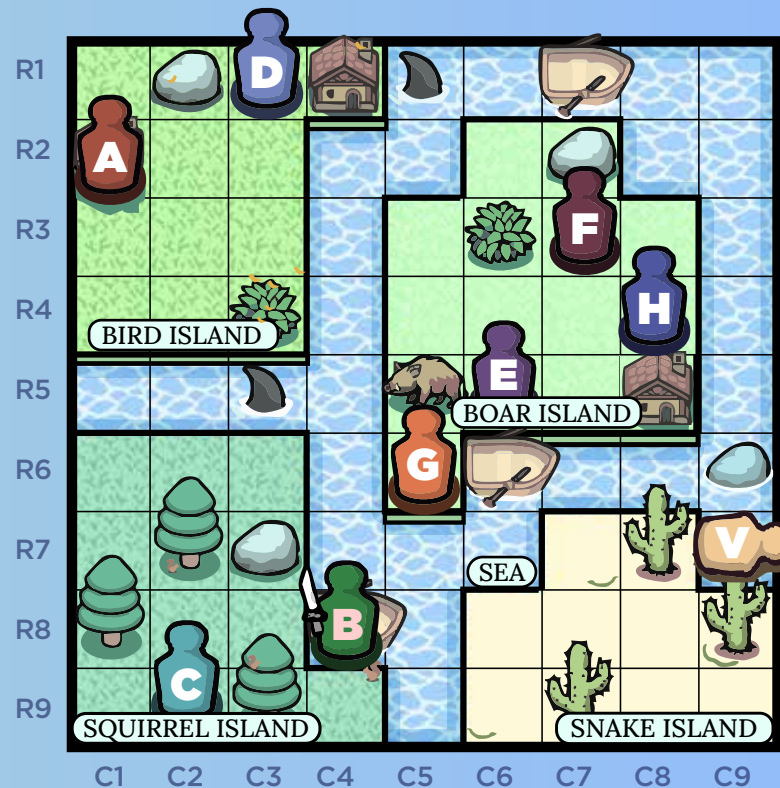

Whether H is beside a house, a boulder or a shrub, D must be in C2 or C3. C is also in C2 or C3. F then can only be beside the shrub, in R3 C7.

6. This isolates H.

7. This isolates D also beside a house, and G.

8. This isolates C.

- This isolates V in the last square, alone in the Sea with B. Bjorn is the murderer!

The murderer is...
